### Did you know that ...

... the archipelago carried the common name Apsyrtides in ancient times?

... the islands of Cres & Lošinj are the home of about 190 bird species?

... the waters of the coast of Cres and Lošinj are the playground of about 150 dolphins?

... there are almost 1,500 plant species on the islands?

... one of the most valuable archaeological discovery from ancient times was found in the waters of Lošinj: the bronze statue of the athlete Apoksiomenes from the 4th century BC?

### Geographical Location

The Cres and Lošinj islands are part of

the archipelago in the Kvarner Bay. Cres, the biggest island in Croatia (length 68 km, width 13 km) is connected to the island of Lošinj by a pull-bridge in Osor. The freshwater lake Vrana is to be highlighted as an unusual natural phenomenon. A lake that supplies the islands with drinking water. The Lošinj island group consists of the island of Lošinj (74.68 km<sup>2</sup>) as well as the smaller islands of Unije, Ilovik, Susak, Srakane and further uninhabited islands.

### Climate

The northern part of Cres is part of the sub-Mediterranean zone, whilst the remainder of the archipelago is part of the Mediterranean zone. The climate is rich in sunshine and mild, with warm, dry summers and rainy autumns and winters. The average temperature is 24 deg C in summer. The sea temperature is 22 deg C in summer. Bora (north-

easterly wind), Jugo (southerly wind) and Maestral (north-westerly wind) are the most common wind patterns.

## Trips

The [city sightseeing](#) turns into an enjoyment of nature and culture for you or your relax on a [cruise](#) to the nearby islands of Susak, Ilovik and Unije, or visit the Zanja Bay with the Blue Grotto.

The islands offer [hiking](#) on easy-going pathways. The highest mountains are Sis (altitude 648 m) and Gorice (650 m) on Cres and Osorščica on Lošinj with its Televrin peak at 589 m altitude. Mount Osorščica is very attractive for enthusiasts of long hikes. The romantic walking trails along the riverbed or through the pine forests are ideal for [extended strolls](#).

After a tiring hike you will enjoy [swimming](#), [surfing](#) or [sailing](#) in the turquoise-blue clear water. Many [diving centers](#) on the islands organize trips and diving lessons.

Should you, against all expectations, have to endure a cloudy day, then you can make the best of it and [visit a museum](#) in Cres, Osor or Mali Lošinj. Many archaeological remains, a museum for the sacral arts, an archeological collection and the cathedral are reminders of Osor glorious and rich past.

The mild Mediterranean climate allows you to play [tennis](#) outside almost throughout the entire year. You will find many well-kept tennis courts across the islands. Explore the island with your [bike](#) or rent one from here.

On the southern tip of the island Cres – 15 km from Osor – you will find the camping site within a dense pine forest directly on the sea, an oasis of tranquility, hidden bays and crystal-clear water. If you look for tranquility and relaxation away from the hectic life and noise, then the Baldarin camping is the right decision regarding your holidays.

# Sanitary facilities standards of

JADRANKA KAMPOVI Ltd.

After five years of investing in sanitary facilities of the camps Slatina, Baldarin and Čikat, we are proud to present mostly renovated and modernized sanitary facilities to you.

Sanitary facilities are equipped according to the highest standards of German ADAC and the Republic of Croatia's Ministry of Tourism, and in addition to the basic ones, following facilities are provided:

- Children's sanitary facilities (showers, toilets)
- Baby changing tables
- Family bathrooms
- Points for clothes ironing
- Clothes washers and dryers
- Sanitary facilities for the disabled

All sanitary facilities are well maintained by our employees that try to meet high criteria and standards set by the company's Management, as well as the most important assessment criteria of our guests.

# Health Tourism

The most frequent health problems affecting people these days are the numerous respiratory diseases caused by stress and the increasingly polluted air that we breathe.

**Do you have difficulty breathing? Do you suffer from asthma or chronic obstructive pulmonary disease?**

Come to Lošinj and breathe fully once again! Join the pulmonary rehabilitation program.

## PULMONARY REHABILITATION PROGRAM

The pulmonary rehabilitation program has been developed in accordance with scientifically-based clinical and diagnostic methods combined with the natural healing factors and aerosols characteristic of the island that has been considered a natural climatic health resort for more than 100 years now. The program has been designed with the aid and support of the Croatian Pulmonary Society.

### Who is the program intended for?

The program is intended for both children and adults with lighter forms of obstructive breathing disorders, those suffering from asthma or chronic obstructive pulmonary disease, persons who live in cities with high industrial pollution rates, etc.

### How is the program administered?

The rehabilitation is performed individually or in groups. The minimum required rehabilitation period is 14 days (2 weeks), while 21 days (3 weeks) is considered optimal.

The program is administered in Hotel Punta, Veli Lošinj. The pulmonary rehabilitation program is adjusted to each user separately.

The program starts and ends with an examination performed by a specialist who clinically assesses the success of pulmonary rehabilitation. For more information concerning the pulmonary rehabilitation program, visit the following website:

[www.camps-cres-losinj.com/health-tourism-in-croatia.aspx](http://www.camps-cres-losinj.com/health-tourism-in-croatia.aspx)

**Scientifically proven!**

- an 11-day stay increases the forced vital capacity (FVC) and the peak expiratory flow (PEF) in the first second
- Austro-Hungarian Emperor Franz Josef proclaimed Lošinj a climatic health resort in 1892

# Come to Lošinj and Breathe Fully...

Average temperature on the islands of Cres and Lošinj:

- October 17,4°
- November 13,1°
- December 10,1°
- January 8,9°
- February 8,8°
- March 10,9°

## Winter Tourism

After summer, winter slowly approaches.

Do you wish to escape it?

A Mediterranean oasis, a small heaven on earth for both body and soul, awaits you on the Island of Lošinj. Camp Čikat started operating all year round.

Situated far from the mainland, Lošinj offers breath-taking open sea vistas, while the warm sea currents washing its shores have helped create a truly beneficial climate. Thanks to mild temperatures in winter months, you can enjoy the beneficial features of the island all year round, without the stress and bustle of the peak season. Hidden in a cove, in a pine forest, Camp Čikat offers the perfect place for your escape. The smell of pine resin, Mediterranean herbs and sea salt is felt in every corner. You can enjoy the numerous walkways along the sea.

**Lošinj climate not only helps restore strength to an exhausted soul, but works miracles for health as well.**

## Places from A - Z

### Cres

is the largest town on the island of the same name and the second biggest town in the archipelago. You will best experience the Venetian influence if you walk along the narrow streets and lanes. Numerous churches, palaces, town gates and towers tell of the town's ancient past.

### Lubnice

The historical village Lubnice is situated on a mountain ridge at 378 m above sea level. The unique location, steep cliff over the sea and magnificent house architecture are fascinating on their own merit. A cultural highlight are the concerts during the summer season.

### Valun

is known through the television series „Meeting the Sun“. A small harbor and houses close to each other, along with a multitude of shops entice us to stop for a moment.

### Martinšćica

is located only 1 km from the Slatina camping site. There is a nice promenade from the Tiha cove that leads right to the charming town port. The town has charming restaurants, coffee houses, one grocery store, post office and a tourist bureau.

### Osor

This is an ancient town which developed into an important town for seafarers at the time of intense shipping along the coastline, given its sheltered port and numerous small coves. Apart from that, the bishop also had his seat in Osor, so even today, we stumble across remnants of the past everywhere. Art events and the renowned „Osor Musical Nights“ transform this town during summer into one of the busiest places on the island. You can reach the island of Lošinj by crossing a pull-bridge.

### Punta Križa

As this small township is located on a hill, a view of the sea extends on all sides. Punta Križa is the interchange of village trails that lead to various shepherds villages. In view of the fact that this small place is far from the main road and can only be reached via a narrow, winding road, rest and tranquility are guaranteed. You will experience nature yourself in the coastal oak forest, or in jasmine trees and wild animals.

### Mali Lošinj

is the largest town in the Kvarner Bay. The beginnings of Mali Lošinj date back to the 12th century when it gradually became a harbor town. At the end of 19th century, the medicinal effects of the island's climate were discovered and the island was transformed into a fashionable Austro-Hungarian winter health resort. Located inside a sheltered cove, surrounded by white houses with red roofs, church and a typical bell tower - that's how you should envisage Mali Lošinj. In the Mali Lošinj of today, there is a hospital, pharmacy, police station, post office, shipyard, banks, numerous shops and attractive coffee houses along the shore. The newly renovated square in front of the harbor draws us to stop for a moment.

### Veli Lošinj

is located 4 km south east of the Mali Lošinj. Immediately on entering the port, an imposing Baroque parish church with a bell tower rises into the air. High foreparts on houses inside the port and lavishly decorated villas with blossoming gardens are a special characteristic of this town. Numerous exotic and unusual plants have been brought to the homeland by sailors on distant voyages.
